

2016 Mathematics Game

Rules of the Game: Use only the digits 2, 0, 1, and 6, in any order, with the operations +, -, x, / (divide), ^ (raised to a power), sqrt (square root), ! (factorial), and !! (double factorial) to write expressions for the counting numbers 1 through 100. Grouping symbols may also be used. This year, see how far you can get without using multi-digit numbers such as 20, 210, .02. However, they will still be accepted in the online submissions. Write your answers in the boxes below, using no equal signs.

Correct format: $(2 + 0) - 1 + 6$.

Incorrect format: $2 + 0 = 2 - 1 = 1 + 6 = 7$.
