

For Tallying Numbers up to the Billions

This is a grid for listing numbers you wish to tally. It is a companion to the 'Ninety-nine Square Grid' which can be used to add and subtract numbers through the simple method of counting.

Place numbers for tallying in the appropriate columns. This grid is very handy for numbers of any size.

It helps you to match printed numbers with the spoken numbers and written versions such as you would need in writing out bank checks for large sums. You never know when you'll have to write a check for Thirteen Hundred Million, Eighty Five Thousand, and Seven Hundred Sixty Two Dollars!
